Introduction

Our department is the first in the country to offer specialized knowledge in physical education and sports, and our department takes a leading and prominent place in PE academic research.

- In-service training program and abundant resources provided
- Excellent teaching team equipped with both theoretical and practical knowledge which carries out exact instruction and evaluation, maintains the teaching quality and focuses on effective teacher-student interactions
- Our instructors specialize in scientific research and humanistic research which includes six disciplines and have made exceptional achievements with their full efforts in coaching students, running research programs and executing industry-university cooperative research projects.
- Our nearly-70-year-old NTNU Sports Performance is the first of its kind in the country and has attracted much attention among many universities.
- Concrete rewards are offered to actively encourage

students to learn the second foreign language, develop academic and practical skills, and earn relative certifications.

- Apart from wonderful performance in sports competitions, our students also show such great passion for service that they often hold well-praised events to promote circle-island tours or to serve remote areas as volunteers.

Wen Tzu Yun, a graduate student in our master program, has claimed the Gold medal in the women's karate under 55 kg at 2018 Asian Games.

Lei Chien Ying, a graduate student in our doctoral program, has grabbed the Silver medal in women's team recurve archery at 2018 Asian Games.

Instructional Objectives

- To cultivate physical activity-related knowledge, skills, and to broaden practical experience.
- To cultivate excellent PE and sports experts.
- To cultivate PE and sports-related international horizons and diversified leadership.
- To cultivate the awareness of physical activity research through advanced courses.

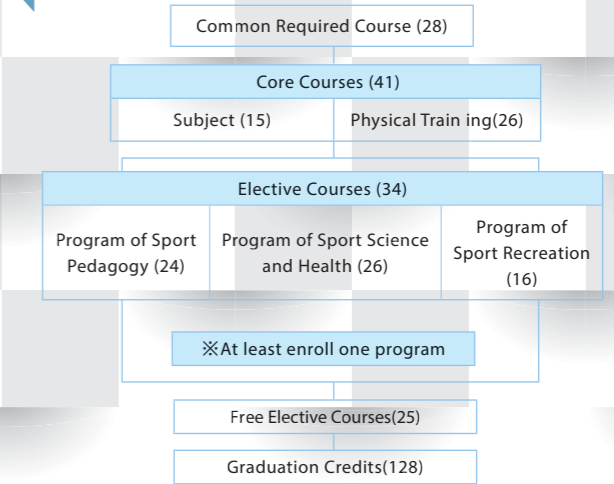

The Sports Show of Class 2019, Department of Physical Education in National Taiwan Normal University.

Feature of the Curriculum

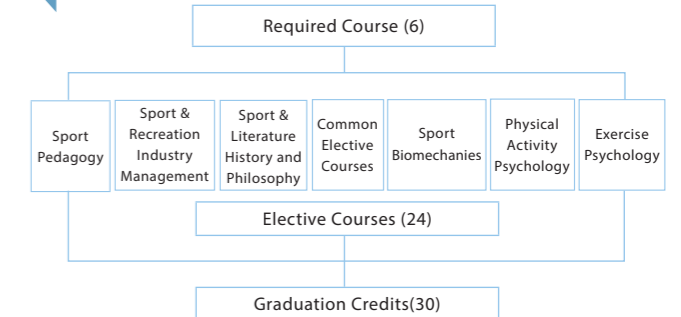

- Balancing theory and practice, our curriculum offers advancement in both academia and practical fields.
- In the promotion of physical education research, we have divided research fields into six different areas: integrated literature, history, philosophy in sports, sports pedagogy, integrated sports and recreation industry management, sports physiology, sports biomechanics, and psychology of physical activities.
- We have integrated research H.R. to formulate interdepartmental, intercollegiate research projects and industry-university cooperative courses.

Degree Requirements

Undergraduate

Master & PhD Program
