

School of Life Science

The School of Life Science belongs to the College of Science. Founded in 2018, we aim to integrate the Departments and Graduate Institutes of the field of biology in NTNU. Our office and faculty members are in the building of College of Science, Gongguan Campus.

The school of Life Science is made up of one department and four undergraduate / graduate programs. Life Science Department includes bachelor, master's and doctoral programs. The four undergraduate / graduate programs are Undergraduate Program of Nutrition Science, Graduate Program of Nutrition Science, Graduate Program of Biotechnology and Pharmaceutical Industries, and TIGP-Biodiversity, which is cooperated with Academia Sinica.

There are over 35 professional teachers in the School now, and their professional field includes ecology, biodiversity, physiology, cell biology and molecular medicine, biotechnology and pharmaceutical industries, and nutrition science.

School of Life Science had made cooperation with hospitals for more research opportunities and courses, and we keep seeking for cooperation with related industries.
