Introduction

- We offer bachelor's, master's and doctoral programs. Our educational goal is to strengthen professional knowledge in the field of life science and to train teachers in this field. The focus of our curriculum is on foundational knowledge, practical technologies, and research methods. The atmosphere of research is prevalent and the learning of students is supported by faculty research programs, scholarships, and exchange student programs.
- There are over 30 outstanding professors in our department, all with doctoral degrees.
- We offer abundant courses and resources and offer different curriculums for students looking to specialize in different careers.

Instructional Objectives

- Biological research.
- Expertise in the biological industry.
- Education of biology teachers.

Degree Requirements

Undergraduate students

Common Required	Department Required	Elective Courses		Total Credits for Graduation
		Department Electives	Free Electives	
28	40	35	25	128

Postgraduate students

Degree	Required Course	Core Required courses	Core Elective Courses	Elective Courses	Total Credits for Graduation
M.S	4	3-6	Select at Least Two(4-6)	8-13	24
Ph.D	8	3-6	Select at Least Two(4-6)	4-9	24

Feature of the Curriculum

- We offer courses in three major fields, including:
 - (1) Physiology
 - (2) Ecology and Evolution
 - (3) Cell and Molecular Biology

Career Prospects

- Further Study: Graduate school programs in life science, medicine, bio-technology, and science education.
- Work: Biology teacher of junior and senior high school. Research assistant in college or research center. Docent of biological exhibition, national park or museum. Researcher in company of biotechnology or pharmaceutical institute.
